## Hayseeds Quote Upsets Viewers

*Ally Sheedy*

Moses White, the gruff and beloved iconic matriarch of the White clan on Hayseeds, made comments in an interview with the Nashville Scene that have many viewers across the nation hot under the collar.

“It is my feeling that on the balance, them that follow the teachings of that pretender are universally close minded as to other possibilities in this life. I mean, if a mother knows that the seed growing inside her has turned away from the Lord, what choice does she have but to end what could be an evil life? The choice is only natural.”

The Whites are known to follow a charismatic offshoot of Christianity that believes there are many incarnations of the messiah, and calls the legitimacy of Jesus Christ into some question as they hold that John the Baptist was a messiah. While their beliefs have been openly stated during the show, TLC, the network they air on, has cut most of the more extreme beliefs from the aired episodes.

The apparent pro-abortion and seemingly pro-home abortion comments come just as the penultimate episode of the season airs, a Christmas episode. The much anticipated finale airs January third, and has been touted by the network as containing “impossible, incredible footage that will change people’s basic views of the world around them.”

## Holiday Flu and Concern Over Insurance Floods Local ERs

*Patients with uncertain insurance wait to be seen as a flu and uncertainty over changing health care laws and practices cause many to go to local emergency rooms.*

## Minor Fire Clears AT&T Building

*Barry Bostwick*

A fire that started in the center of a computer complex spread due to a faulty extinguisher system. The resulting effort to put out the fire caused a substantial loss of expensive equipment owned by several different companies.

A spokesperson for Binah Technologies, one of the major holders of equipment in the facility said that while the loss of equipment was substantial, backup equipment was sufficient to continue operations. Left Eye Designs, a leading social networking solutions provider, was also affected by the loss, and similarly stated that while the loss of equipment was substantial, they would not be affected by the loss.

With no loss of life, law enforcement investigations have concluded.

## Investigation into Ant Disappearance

*Anthony Rapp*

Experts are at a loss to explain the recent decline in the local ant population. Even though it is December, a recent unexpected warm front should mean an increase in ant population and activity.

Theories abound as to the cause of this population loss. One theory is a fungal infection, similar to the one that causes colony collapse in bees. A more fringe theory is an experimental pesticide or food additive has leaked due to incompetence or industrial espionage.

Teams from Tennessee State University and Vanderbilt are racing to be the first to find the answer. Do not be surprised to see scientists in full protective lab gear taking soil and plant samples and running field experiments.

Have you seen the new e-cig shops opening up in Antioch? They are kind of creepy, but they offer the best deals – better even than the internet!

Dude, did you see the guy with the eyepatch hanging out at the Dunkin Donuts? He was asking people a bunch of questions like he was looking for vampires. What a creepy fucker.

Hayseeds continues to cause protests. It looks like the local conspiracy minded bible thumpers have added it to their regular set of “things we are outraged about”, like D&D and Obamacare. (Presence+Socialize, Intelligence+Computer)

### FEEDING RESISTANCE: 2

Do a hunting draw, subtract the above from your pool. Success: start full. Failure: start down four or twice your blood potency, whichever is larger. You may run a feeding scene to “top off”.

*If you are unaligned, add three to the above.*
